For the wellbeing of its collaborators, Fedon has inaugurated a multifunctional space called “The Mind Garden”.

A few years ago at its head office in Alpage, Fedon opened **The Mind Gym**, an area created with the precise aim of becoming a cultural hub where it could connect with the community and the territory through events and meetings with a wide variety of themes.

From the experience of this area and the need to develop different ways of sharing ideas, the New Generation Team at Fedon, a group of the company's youngest collaborators, has promoted the birth of **The Mind Garden**.

A space by and for all collaborators, where they can share ideas or relax their mind while sipping a coffee. A putting green, a book shop dedicated to book sharing and a wall-length blackboard for jotting down ideas are just some of the characteristic elements of this new space for regenerating.

In the centre, a bitter orange tree symbolises rebirth and relates to the natural surroundings, like the medicinal herbs arranged in the area and the dispenser of cool micro-filtered water where every collaborator can fill the **CASE2Green** bottle made of 100% recyclable Tritan that was gifted at the inauguration.

In the coming months, **The Mind Garden** will prove to be an innovative space where the best ideas will be born and where the socialising that was forgone due to the restrictions imposed by the pandemic will begin again.
